About me

Senior Frontend Developer | eCommerce Expert

10+ years of experience designing high-performance, accessible, and AI-enhanced digital experiences. Transforming complex technology into fast, intuitive, and human-centered interfaces that deliver measurable business results.

Architecture & Stack:
Headless solutions on Next.js + Contentful/Shopify; enterprise ecosystems on AEM + React + Magento. Follow W3C web standards and ISO/IEC 25010 quality principles to ensure scalability, interoperability, and maintainability across systems.

Performance & Accessibility:
Optimize rendering so PageSpeed, GTmetrix, and Web Vitals have nothing to criticize. Design interfaces compliant with WCAG 2.1 AA / ADA verified via WAVE, and aligned with W3C accessibility guidelines, making digital experiences inclusive for every user.

Code Quality & DX:
Ensure clean, maintainable, and secure code aligned with team conventions, ISO/IEC 25010 quality standards, and OWASP best practices for safe and sustainable development.

SEO & Analytics:
Develop SEO-driven architectures following Google Search Essentials and schema.org structured data standards, leveraging Google Analytics 4 insights for measurable optimization. Mission: I transform business ideas, human knowledge, and creativity into code and data.

Education

Specialist Degree in Aircraft Radio Electronic Systems Design   Jan 2007 - Dec 2013
National Aerospace University "KhAI" (Kharkiv Aviation Institute)

Employment

Front-End Developer – E-commerce Platforms (Magento 2 / AEM / React / Next.js)   Jun 2021 - Present
Overdose, Kharkiv

- Developed interfaces for a large e-commerce platform using Magento 2, AEM, React, Next.js, and Contentful, working with complex data flows and dynamic content delivery.
- Implemented core front-end functionality across PLP, PDP, Search Results, Cart, Checkout, Account, and post-purchase pages.
- Built and maintained CMS-driven components (AEM/Contentful), improved JSON data handling, and optimized the content-rendering pipeline.
- Created reusable React components and optimized high-traffic UI elements such as filters, pagination, navigation drawers, and price sliders.
- Developed configurable form-based pages with validation, conditional logic,

file uploads, and integration with GraphQL/REST APIs.
- Developed a configurable email templating system, including a build pipeline that compiles modular components into fully tested, production-ready HTML emails.
- Enhanced front-end performance by reducing layout shifts, optimizing image delivery, and resolving rendering inconsistencies across major browsers and operating systems.
- Implemented functionality related to loyalty systems, discounts, affiliate flows, and digital/physical gift cards.
- Collaborated with backend teams to refine API schemas, resolve data inconsistencies, and enhance integration between services.
- Contributed to multi-step checkout improvements, including address validation, shipping logic, payment integrations, and error handling.
- Worked in a high-multitasking environment, supporting and maintaining multiple projects per day, including quick fixes and urgent support tasks.
- Performed continuous maintenance, bug fixing, smoke testing, and technical improvements across multiple environments (dev, staging, UAT, production).

Magento Front-End Developer   **Aug 2018 - Jun 2021**
WebMeridian, Kharkiv

- Implemented pixel-perfect UI for Magento 2 storefronts based on Figma/Sketch designs, ensuring full visual consistency across devices and browsers.
- Developed the front-end layer of custom Magento modules, including product configurators, dynamic option selectors, and interactive catalog features.
- Built and refined PDP/PLP layouts, product cards, variant selectors, price presentations, badges, and promotional UI blocks.
- Created and maintained multi-language and multi-storefront themes, including full support for RTL (Arabic script) with proper layout mirroring and typographic adjustments.
- Improved the architecture of visual components, ensuring clean markup, accessibility compliance, and maintainable LESS/SCSS/CSS structure.
- Integrated UI logic for configurable, bundle, and complex product types, covering dynamic attributes, interactive galleries, and live price updates.
- Performed ongoing bug fixing, cross-browser adjustments, UI polishing, and rendering optimization for high-traffic store pages.
- Collaborated with backend teams to align REST/GraphQL API contracts, improve data consistency, and ensure smooth integration of custom frontend functionality.
- Supported multiple Magento 2 projects, delivering fast iterations, UI enhancements, and consistent user-experience improvements across stores and languages.

Front-End Developer – Shopware / CMS / E-commerce   **Aug 2016 - Aug 2018**
Webiprog INC., Kharkiv

- Developed responsive, cross-browser web interfaces based on detailed design specifications (Figma, Sketch), ensuring accurate visual implementation across devices.
- Integrated front-end layouts with Shopware 5 as the primary platform, and additionally supported integrations with WordPress, Shopify, Magento, Gambio, OXID, Joomla, OpenCart, and Zen Cart.
- Customized and extended Shopware themes: product listings, detail pages,

checkout sections, promotions, and reusable storefront components.
- Implemented dynamic UI features using Twig, JavaScript, and CMS-driven configuration options, adapting components to multi-store and multi-language setups.
- Optimized page rendering, reduced layout shifts, improved performance scores, and refactored legacy front-end codebases for better maintainability.
- Enhanced the visual layer of plugins/modules, ensured compatibility with Shopware updates, and maintained stable storefront behavior during version upgrades.
- Performed continuous maintenance, bug fixing, refactoring, and functional improvements to support evolving project requirements.
- Collaborated with designers and backend teams to align UI/UX with platform capabilities, ensuring smooth data flow and consistent user experience across storefronts.

Front-End Developer – Joomla / CMS   **Jan 2016 - Jul 2016**
iEdgeMedia, Kharkiv

- Developed and maintained websites on Joomla, customizing templates and adapting layouts to meet project requirements.
- Implemented CSS styling, responsive adjustments, and UI refinements, ensuring consistent visual appearance across devices and browsers.
- Configured, extended, and debugged Joomla modules, resolving display issues and improving component functionality.
- Created custom JavaScript enhancements to improve interactivity and extend module capabilities.
- Tested pages, resolved validation, compatibility, and rendering issues, improving overall front-end stability and user experience.

Certificates

Contentful Certified Professional   **Aug 2024**
